The Urgent/Expedited service request designation should only be used if the treatment is required to prevent serious deterioration in the member's health or could jeopardize their ability to regain maximum function. Requests outside of this definition will be handled as routine/non-urgent.

- If a request for services is denied, the requesting provider and the member will receive a letter explaining the reason for the denial and additional information regarding the grievance and appeals process. Denials also are communicated to the provider by telephone, fax, or electronic notification. Verbal, fax, or electronic denials are given within one business day of making the denial decision or sooner if required by the member's condition.

Applicable Codes: The procedure and/or diagnosis codes on the table are provided for reference purposes only and may not be all-inclusive. Benefit coverage for health services is determined by the member-specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other policies and guidelines may apply.
